Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

All Vehicles		3064	0.1	0.390	5.7	LOS A	2.4	61.3	0.38	0.25	33.5

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 2010). Site LOS Method is specified in the Parameter Settings dialog (Site tab).
Roundabout LOS Method: Same as Sign Control.
Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.
LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).
Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 2010).
Roundabout Capacity Model: SIDRA Standard.
HCM Delay Formula option is used. Control Delay does not include Geometric Delay since Exclude Geometric Delay option applies.
Gap-Acceptance Capacity: SIDRA Standard (Akçelik M3D).
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Date performed: 10/19/2016
Analysis time period: AM Peak Period
Freeway/Dir of Travel: US 101 Northbound
Junction: Boronda Road Off Ramp
Jurisdiction: Caltrans
Analysis Year: Existing
Description: Salinas West Area Specific Plan

Freeway Data

Type of analysis	Diverge	
Number of lanes in freeway	2	
Free-flow speed on freeway	65.0	mph
Volume on freeway	1831	vph

Off Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-Flow speed on ramp	45.0	mph
Volume on ramp	540	vph
Length of first accel/decel lane	150	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent ramp		vph
Position of adjacent ramp		
Type of adjacent ramp		
Distance to adjacent ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway		Ramp		Adjacent Ramp	
Volume, V (vph)	1831		540			vph
Peak-hour factor, PHF	0.90		0.90			
Peak 15-min volume, v15	509		150			v
Trucks and buses	5		5			%
Recreational vehicles	0		0			%
Terrain type:	Level		Level			
Grade	0.00	%	0.00	%		%
Length	0.00	mi	0.00	mi		mi
Trucks and buses PCE, ET	1.5		1.5			
Recreational vehicle PCE, ER	1.2		1.2			

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	2085	615	pcph

Estimation of V12 Diverge Areas

L_{EQ} = (Equation 13-12 or 13-13)

P_{FD} = 1.000 Using Equation 0

$v_{12} = v_R + (v_F - v_R) P_{FD}$ = 2085 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
$v_{Fi} = v_F$	2085	4700	No
$v_{FO} = v_F - v_R$	1470	4700	No
v_R	615	2100	No
v_3 or v_{av34}	0 pc/h	(Equation 13-14 or 13-17)	

Is v_3 or v_{av34} > 2700 pc/h? No

Is v_3 or v_{av34} > 1.5 v_{12} /2 No

If yes, v_{12A} = 2085 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Diverge Influence Area

	Actual	Max Desirable	Violation?
v_{12}	2085	4400	No

Level of Service Determination (if not F)

Density, $D_R = 4.252 + 0.0086\, v_{12} - 0.009\, L_D$ = 20.8 pc/mi/ln

Level of service for ramp-freeway junction areas of influence C

Speed Estimation

Intermediate speed variable,	D_S = 0.353	
Space mean speed in ramp influence area,	S_R = 56.9	mph
Space mean speed in outer lanes,	S_0 = N/A	mph
Space mean speed for all vehicles,	S = 56.9	mph

Diverge Analysis

Analyst:	Fehr & Peers
Agency/Co.:	
Date performed:	09/26/2018
Analysis time period:	AM Peak Period
Freeway/Dir of Travel:	US 101 Northbound
Junction:	Laurel Drive Off Ramp
Jurisdiction:	Caltrans
Analysis Year:	Existing+CASP

Description: Salinas Central Area Specific Plan

Freeway Data

Type of analysis	Diverge	
Number of lanes in freeway	3	
Free-flow speed on freeway	65.0	mph
Volume on freeway	1847	vph

Off Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-Flow speed on ramp	45.0	mph
Volume on ramp	360	vph
Length of first accel/decel lane	150	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent ramp		vph
Position of adjacent ramp		
Type of adjacent ramp		
Distance to adjacent ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway		Ramp		Adjacent Ramp	
Volume, V (vph)	1847		360			vph
Peak-hour factor, PHF	0.90		0.90			
Peak 15-min volume, v15	513		100			v
Trucks and buses	5		5			%
Recreational vehicles	0		0			%
Terrain type:	Level		Level			
Grade	0.00	%	0.00	%		%
Length	0.00	mi	0.00	mi		mi
Trucks and buses PCE, ET	1.5		1.5			
Recreational vehicle PCE, ER	1.2		1.2			

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	2104	410	pcph

Estimation of V12 Diverge Areas

L_{EQ} = (Equation 13-12 or 13-13)

P_{FD} = 0.689 Using Equation 9

$v_{12} = v_R + (v_F - v_R) P_{FD}$ = 1576 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
$v_{Fi} = v_F$	2104	7050	No
$v_{FO} = v_F - v_R$	1694	7050	No
v_R	410	2100	No
v_3 or v_{av34}	528 pc/h	(Equation 13-14 or 13-17)	
Is v_3 or v_{av34} > 2700 pc/h?		No	
Is v_3 or v_{av34} > 1.5 v_{12}/2		No	

If yes, v_{12A} = 1576 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Diverge Influence Area

	Actual	Max Desirable	Violation?
v_{12}	1576	4400	No

Level of Service Determination (if not F)

Density, $D_R = 4.252 + 0.0086\, v_{12} - 0.009\, L_D$ = 16.5 pc/mi/ln

Level of service for ramp-freeway junction areas of influence B

Speed Estimation

Intermediate speed variable,	D_S = 0.335	
Space mean speed in ramp influence area,	S_R = 57.3	mph
Space mean speed in outer lanes,	S_0 = 71.3	mph
Space mean speed for all vehicles,	S = 60.3	mph

Merge Analysis

Analyst:	Fehr & Peers
Agency/Co.:	
Date performed:	09/26/2018
Analysis time period:	AM Peak Hour
Freeway/Dir of Travel:	US 101 Southbound
Junction:	Laurel Drive On Ramp
Jurisdiction:	Caltrans
Analysis Year:	Existing+CASP

Description: Salinas Central Area Specific Plan

Freeway Data

Type of analysis	Merge	
Number of lanes in freeway	2	
Free-flow speed on freeway	65.0	mph
Volume on freeway	2393	vph

On Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-flow speed on ramp	45.0	mph
Volume on ramp	515	vph
Length of first accel/decel lane	1000	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent Ramp		vph
Position of adjacent Ramp		
Type of adjacent Ramp		
Distance to adjacent Ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway	Ramp	Adjacent Ramp	
Volume, V (vph)	2393	515		vph
Peak-hour factor, PHF	0.90	0.90		
Peak 15-min volume, v15	665	143		v
Trucks and buses	5	5		%
Recreational vehicles	0	0		%
Terrain type:	Level	Level		
Grade	%	%	%	
Length	mi	mi	mi	
Trucks and buses PCE, ET	1.5	1.5		
Recreational vehicle PCE, ER	1.2	1.2		

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	2725	587	pcph

Estimation of V12 Merge Areas

L_{EQ} = (Equation 13-6 or 13-7)

P_{FM} = 1.000 Using Equation 0

$v_{12} = v_F (P_{FM})$ = 2725 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
v_{FO}	3312	4700	No
v_3 or v_{av34}	0 pc/h	(Equation 13-14 or 13-17)	
Is v_3 or v_{av34} > 2700 pc/h?		No	
Is v_3 or v_{av34} > 1.5 v_{12}/2		No	

If yes, v_{12A} = 2725 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Merge Influence Area

	Actual	Max Desirable	Violation?
v_{R12}	3312	4600	No

Level of Service Determination (if not F)

Density, $D_R = 5.475 + 0.00734\, v_R + 0.0078\, v_{12} - 0.00627\, L_A$ = 24.8 pc/mi/ln

Level of service for ramp-freeway junction areas of influence C

Speed Estimation

Intermediate speed variable,	M_S = 0.338	
Space mean speed in ramp influence area,	S_R = 57.2	mph
Space mean speed in outer lanes,	S_0 = N/A	mph
Space mean speed for all vehicles,	S = 57.2	mph

Analyst: Fehr & Peers
Agency/Co.:
Date performed: 10/18/2016
Analysis time period: AM Peak Hour
Freeway/Dir of Travel: US 101 Northbound
Junction: Laurel Drive Loop On Ramp
Jurisdiction: Caltrans
Analysis Year: Existing+WASP+CASP
Description: Salinas West Area Specific Plan

Freeway Data

Type of analysis	Merge	
Number of lanes in freeway	2	
Free-flow speed on freeway	65.0	mph
Volume on freeway	1633	vph

On Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-flow speed on ramp	35.0	mph
Volume on ramp	294	vph
Length of first accel/decel lane	750	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent Ramp		vph
Position of adjacent Ramp		
Type of adjacent Ramp		
Distance to adjacent Ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway	Ramp	Adjacent Ramp	
Volume, V (vph)	1633	294		vph
Peak-hour factor, PHF	0.90	0.90		
Peak 15-min volume, v15	454	82		v
Trucks and buses	5	5		%
Recreational vehicles	0	0		%
Terrain type:	Level	Level		
Grade	%	%	%	
Length	mi	mi	mi	
Trucks and buses PCE, ET	1.5	1.5		
Recreational vehicle PCE, ER	1.2	1.2		

```

Merge Analysis

Analyst:	Fehr & Peers
Agency/Co.:	
Date performed:	10/19/2016
Analysis time period:	PM Peak Hour
Freeway/Dir of Travel:	US 101 Northbound
Junction:	Laurel Drive Loop On Ramp
Jurisdiction:	Caltrans
Analysis Year:	Existing+WASP+CASP

Description: Salinas West Area Specific Plan

Freeway Data

Type of analysis	Merge	
Number of lanes in freeway	2	
Free-flow speed on freeway	65.0	mph
Volume on freeway	2769	vph

On Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-flow speed on ramp	35.0	mph
Volume on ramp	456	vph
Length of first accel/decel lane	750	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent Ramp		vph
Position of adjacent Ramp		
Type of adjacent Ramp		
Distance to adjacent Ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway	Ramp	Adjacent Ramp	
Volume, V (vph)	2769	456		vph
Peak-hour factor, PHF	0.90	0.90		
Peak 15-min volume, v15	769	127		v
Trucks and buses	5	5		%
Recreational vehicles	0	0		%
Terrain type:	Level	Level		
Grade	%	%	%	
Length	mi	mi	mi	
Trucks and buses PCE, ET	1.5	1.5		
Recreational vehicle PCE, ER	1.2	1.2		

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	3154	519	pcph

Estimation of V12 Merge Areas

L_{EQ} = (Equation 13-6 or 13-7)

P_{FM} = 1.000 Using Equation 0

$v_{12} = v_F (P_{FM})$ = 3154 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
v_{FO}	3673	4700	No
v_3 or v_{av34}	0 pc/h	(Equation 13-14 or 13-17)	
Is v_3 or v_{av34} > 2700 pc/h?		No	
Is v_3 or v_{av34} > 1.5 v_{12}/2		No	

If yes, v_{12A} = 3154 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Merge Influence Area

	Actual	Max Desirable	Violation?
v_{R12}	3673	4600	No

Level of Service Determination (if not F)

Density, $D_R = 5.475 + 0.00734\, v_R + 0.0078\, v_{12} - 0.00627\, L_A$ = 29.2 pc/mi/ln

Level of service for ramp-freeway junction areas of influence D

Speed Estimation

Intermediate speed variable,	M_S = 0.422	
Space mean speed in ramp influence area,	S_R = 55.3	mph
Space mean speed in outer lanes,	S_0 = N/A	mph
Space mean speed for all vehicles,	S = 55.3	mph

Diverge Analysis

Analyst: Fehr & Peers
Agency/Co.:
Date performed: 10/19/2016
Analysis time period: PM Peak Period
Freeway/Dir of Travel: US 101 Northbound
Junction: Boronda Road Off Ramp
Jurisdiction: Caltrans
Analysis Year: Cumulative No Project
Description: Salinas West Area Specific Plan (Without Expressway)

Freeway Data

Type of analysis	Diverge	
Number of lanes in freeway	3	
Free-flow speed on freeway	65.0	mph
Volume on freeway	3830	vph

Off Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-Flow speed on ramp	45.0	mph
Volume on ramp	1340	vph
Length of first accel/decel lane	150	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent ramp		vph
Position of adjacent ramp		
Type of adjacent ramp		
Distance to adjacent ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway		Ramp		Adjacent Ramp	
Volume, V (vph)	3830		1340			vph
Peak-hour factor, PHF	0.90		0.90			
Peak 15-min volume, v15	1064		372			v
Trucks and buses	5		5			%
Recreational vehicles	0		0			%
Terrain type:	Level		Level			
Grade	0.00	%	0.00	%		%
Length	0.00	mi	0.00	mi		mi
Trucks and buses PCE, ET	1.5		1.5			
Recreational vehicle PCE, ER	1.2		1.2			

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	4362	1526	pcph

Estimation of V12 Diverge Areas

L_{EQ} = (Equation 13-12 or 13-13)

P_{FD} = 0.581 Using Equation 9

$v_{12} = v_R + (v_F - v_R) P_{FD}$ = 3173 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
$v_{Fi} = v_F$	4362	7050	No
$v_{FO} = v_F - v_R$	2836	7050	No
v_R	1526	2100	No
v_3 or v_{av34}	1189 pc/h	(Equation 13-14 or 13-17)	

Is v_3 or v_{av34} > 2700 pc/h? No

Is v_3 or v_{av34} > 1.5 v_{12}/2 No

If yes, v_{12A} = 3173 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Diverge Influence Area

	Actual	Max Desirable	Violation?
v_{12}	3173	4400	No

Level of Service Determination (if not F)

Density, $D = 4.252 + 0.0086\, v_{12} - 0.009\, L_D$ = 30.2 pc/mi/ln

Level of service for ramp-freeway junction areas of influence D

Speed Estimation

Intermediate speed variable, D_S = 0.435

Space mean speed in ramp influence area, S_R = 55.0 mph

Space mean speed in outer lanes, S_0 = 70.6 mph

Space mean speed for all vehicles, S = 58.5 mph

Merge Analysis

Analyst: Fehr & Peers
Agency/Co.:
Date performed: 10/18/2016
Analysis time period: AM Peak Hour
Freeway/Dir of Travel: US 101 Southbound
Junction: Boronda Road On Ramp
Jurisdiction: Caltrans
Analysis Year: Cumulative No Project
Description: Salinas West Area Specific Plan (Without Expressway)

Freeway Data

Type of analysis	Merge	
Number of lanes in freeway	3	
Free-flow speed on freeway	65.0	mph
Volume on freeway	3540	vph

On Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-flow speed on ramp	45.0	mph
Volume on ramp	110	vph
Length of first accel/decel lane	800	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent Ramp		vph
Position of adjacent Ramp		
Type of adjacent Ramp		
Distance to adjacent Ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway	Ramp	Adjacent Ramp	
Volume, V (vph)	3540	110		vph
Peak-hour factor, PHF	0.90	0.90		
Peak 15-min volume, v15	983	31		v
Trucks and buses	5	5		%
Recreational vehicles	0	0		%
Terrain type:	Level	Level		
Grade	%	%	%	
Length	mi	mi	mi	
Trucks and buses PCE, ET	1.5	1.5		
Recreational vehicle PCE, ER	1.2	1.2		

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	4032	125	pcph

Estimation of V12 Merge Areas

L_{EQ} = (Equation 13-6 or 13-7)

P_{FM} = 0.600 Using Equation 3

$v_{12} = v_F (P_{FM})$ = 2419 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
v_{FO}	4157	7050	No
v_3 or v_{av34}	1613 pc/h	(Equation 13-14 or 13-17)	
Is v_3 or v_{av34} > 2700 pc/h?		No	
Is v_3 or v_{av34} > 1.5 v_{12}/2		Yes	
If yes, v_{12A} = 2419		(Equation 13-15, 13-16, 13-18, or 13-19)	

Flow Entering Merge Influence Area

	Actual	Max Desirable	Violation?
v_{12A}	2544	4600	No

Level of Service Determination (if not F)

Density, $D_R = 5.475 + 0.00734\ v_R + 0.0078\ v_{12} - 0.00627\ L_A$ = 20.2 pc/mi/ln

Level of service for ramp-freeway junction areas of influence C

Speed Estimation

Intermediate speed variable,	M_S = 0.299	
Space mean speed in ramp influence area,	S_R = 58.1	mph
Space mean speed in outer lanes,	S_0 = 61.0	mph
Space mean speed for all vehicles,	S = 59.2	mph

Recreational vehicle PCE, ER	1.2		1.2			

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	4909	968	pcph

Estimation of V12 Diverge Areas

L_{EQ} = (Equation 13-12 or 13-13)

P_{FD} = 0.593 Using Equation 9

$v_{12} = v_R + (v_F - v_R) P_{FD}$ = 3304 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
$v_{Fi} = v_F$	4909	7050	No
$v_{FO} = v_F - v_R$	3941	7050	No
v_R	968	2100	No
v_3 or v_{av34}	1605 pc/h	(Equation 13-14 or 13-17)	

Is v_3 or v_{av34} > 2700 pc/h? No

Is v_3 or v_{av34} > 1.5 v_{12}/2 No

If yes, v_{12A} = 3304 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Diverge Influence Area

	Actual	Max Desirable	Violation?
v_{12}	3304	4400	No

Level of Service Determination (if not F)

Density, $D_R = 4.252 + 0.0086\, v_{12} - 0.009\, L_D$ = 30.9 pc/mi/ln

Level of service for ramp-freeway junction areas of influence D

Speed Estimation

Intermediate speed variable, D_S = 0.385

Space mean speed in ramp influence area, S_R = 56.1 mph

Space mean speed in outer lanes, S_0 = 68.9 mph

Space mean speed for all vehicles, S = 59.8 mph

Diverge Analysis

Analyst:	Fehr & Peers
Agency/Co.:	
Date performed:	09/24/2018
Analysis time period:	PM Peak Period
Freeway/Dir of Travel:	US 101 Northbound
Junction:	Laurel Drive Off Ramp
Jurisdiction:	Caltrans
Analysis Year:	Cumulative Plus CASP

Description: Salinas Central Area Specific Plan (Without Expressway)

Freeway Data

Type of analysis	Diverge	
Number of lanes in freeway	3	
Free-flow speed on freeway	65.0	mph
Volume on freeway	4096	vph

Off Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-Flow speed on ramp	45.0	mph
Volume on ramp	930	vph
Length of first accel/decel lane	150	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent ramp		vph
Position of adjacent ramp		
Type of adjacent ramp		
Distance to adjacent ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway		Ramp		Adjacent Ramp	
Volume, V (vph)	4096		930			vph
Peak-hour factor, PHF	0.90		0.90			
Peak 15-min volume, v15	1138		258			v
Trucks and buses	5		5			%
Recreational vehicles	0		0			%
Terrain type:	Level		Level			
Grade	0.00	%	0.00	%		%
Length	0.00	mi	0.00	mi		mi
Trucks and buses PCE, ET	1.5		1.5			
Recreational vehicle PCE, ER	1.2		1.2			

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	4665	1059	pcph

Estimation of V12 Diverge Areas

L_{EQ} = (Equation 13-12 or 13-13)

P_{FD} = 0.595 Using Equation 9

$v_{12} = v_R + (v_F - v_R) P_{FD}$ = 3203 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
$v_{Fi} = v_F$	4665	7050	No
$v_{FO} = v_F - v_R$	3606	7050	No
v_R	1059	2100	No
v_3 or v_{av34}	1462 pc/h	(Equation 13-14 or 13-17)	

Is v_3 or v_{av34} > 2700 pc/h? No

Is v_3 or v_{av34} > 1.5 v_{12}/2 No

If yes, v_{12A} = 3203 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Diverge Influence Area

	Actual	Max Desirable	Violation?
v_{12}	3203	4400	No

Level of Service Determination (if not F)

Density, $D = 4.252 + 0.0086\ v_{12} - 0.009\ L_D$ = 30.4 pc/mi/ln

Level of service for ramp-freeway junction areas of influence D

Speed Estimation

Intermediate speed variable, D_S = 0.393

Space mean speed in ramp influence area, S_R = 56.0 mph

Space mean speed in outer lanes, S_0 = 69.5 mph

Space mean speed for all vehicles, S = 59.6 mph

Diverge Analysis

Analyst:	Fehr & Peers
Agency/Co.:	
Date performed:	09/24/2018
Analysis time period:	AM Peak Period
Freeway/Dir of Travel:	US 101 Southbound
Junction:	Laurel Drive Off Ramp
Jurisdiction:	Caltrans
Analysis Year:	Cumulative Plus CASP

Description: Salinas Central Area Specific Plan (Without Expressway)

Freeway Data

Type of analysis	Diverge	
Number of lanes in freeway	3	
Free-flow speed on freeway	65.0	mph
Volume on freeway	3810	vph

Off Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-Flow speed on ramp	45.0	mph
Volume on ramp	703	vph
Length of first accel/decel lane	200	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent ramp		vph
Position of adjacent ramp		
Type of adjacent ramp		
Distance to adjacent ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway		Ramp		Adjacent Ramp	
Volume, V (vph)	3810		703			vph
Peak-hour factor, PHF	0.90		0.90			
Peak 15-min volume, v15	1058		195			v
Trucks and buses	5		5			%
Recreational vehicles	0		0			%
Terrain type:	Level		Level			
Grade	0.00	%	0.00	%		%
Length	0.00	mi	0.00	mi		mi
Trucks and buses PCE, ET	1.5		1.5			
Recreational vehicle PCE, ER	1.2		1.2			

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	4339	801	pcph

Estimation of V12 Diverge Areas

L_{EQ} = (Equation 13-12 or 13-13)

P_{FD} = 0.615 Using Equation 9

$v_{12} = v_R + (v_F - v_R) P_{FD}$ = 2976 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
$v_{Fi} = v_F$	4339	7050	No
$v_{FO} = v_F - v_R$	3538	7050	No
v_R	801	2100	No
v_3 or v_{av34}	1363 pc/h	(Equation 13-14 or 13-17)	

Is v_3 or v_{av34} > 2700 pc/h? No

Is v_3 or v_{av34} > 1.5 v_{12} /2 No

If yes, v_{12A} = 2976 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Diverge Influence Area

	Actual	Max Desirable	Violation?
v_{12}	2976	4400	No

Level of Service Determination (if not F)

Density, $D_R = 4.252 + 0.0086\ v_{12} - 0.009\ L_D$ = 28.0+ pc/mi/ln

Level of service for ramp-freeway junction areas of influence D

Speed Estimation

Intermediate speed variable,	D_S = 0.370	
Space mean speed in ramp influence area,	S_R = 56.5	mph
Space mean speed in outer lanes,	S_0 = 69.9	mph
Space mean speed for all vehicles,	S = 60.1	mph

Merge Analysis

Analyst:	Fehr & Peers
Agency/Co.:	
Date performed:	10/18/2016
Analysis time period:	AM Peak Hour
Freeway/Dir of Travel:	US 101 Northbound
Junction:	Laurel Drive Loop On Ramp
Jurisdiction:	Caltrans
Analysis Year:	Cumulative Plus WASP+CASP

Description: Salinas West Area Specific Plan (Without Expressway)

Freeway Data

Type of analysis	Merge	
Number of lanes in freeway	3	
Free-flow speed on freeway	65.0	mph
Volume on freeway	2775	vph

On Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-flow speed on ramp	35.0	mph
Volume on ramp	340	vph
Length of first accel/decel lane	750	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent Ramp		vph
Position of adjacent Ramp		
Type of adjacent Ramp		
Distance to adjacent Ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway	Ramp	Adjacent Ramp	
Volume, V (vph)	2775	340		vph
Peak-hour factor, PHF	0.90	0.90		
Peak 15-min volume, v15	771	94		v
Trucks and buses	5	5		%
Recreational vehicles	0	0		%
Terrain type:	Level	Level		
Grade	%	%	%	
Length	mi	mi	mi	
Trucks and buses PCE, ET	1.5	1.5		
Recreational vehicle PCE, ER	1.2	1.2		

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	3160	387	pcph

Estimation of V12 Merge Areas

L_{EQ} = (Equation 13-6 or 13-7)

P_{FM} = 0.599 Using Equation 3

$v_{12} = v_F (P_{FM})$ = 1891 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
v_{FO}	3547	7050	No
v_3 or v_{av34}	1269 pc/h	(Equation 13-14 or 13-17)	
Is v_3 or v_{av34} > 2700 pc/h?		No	
Is v_3 or v_{av34} > 1.5 v_{12}/2		Yes	

If yes, v_{12A} = 1891 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Merge Influence Area

	Actual	Max Desirable	Violation?
v_{12A}	2278	4600	No

Level of Service Determination (if not F)

Density, $D_R = 5.475 + 0.00734\ v_R + 0.0078\ v_{12} - 0.00627\ L_A$ = 18.4 pc/mi/ln

Level of service for ramp-freeway junction areas of influence B

Speed Estimation

Intermediate speed variable,	M_S = 0.307	
Space mean speed in ramp influence area,	S_R = 57.9	mph
Space mean speed in outer lanes,	S_0 = 62.2	mph
Space mean speed for all vehicles,	S = 59.4	mph

HCS 2010: Freeway Merge and Diverge Segments Release 6.90

Phone: Fax:
E-mail:

Diverge Analysis

Analyst:	Fehr & Peers
Agency/Co.:	
Date performed:	10/19/2016
Analysis time period:	PM Peak Period
Freeway/Dir of Travel:	US 101 Southbound
Junction:	Laurel Drive Off Ramp
Jurisdiction:	Caltrans
Analysis Year:	Cumulative Plus WASP+CASP

Description: Salinas West Area Specific Plan (Without Expressway)

Freeway Data

Type of analysis	Diverge	
Number of lanes in freeway	3	
Free-flow speed on freeway	65.0	mph
Volume on freeway	4660	vph

Off Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-Flow speed on ramp	45.0	mph
Volume on ramp	896	vph
Length of first accel/decel lane	200	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent ramp		vph
Position of adjacent ramp		
Type of adjacent ramp		
Distance to adjacent ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway		Ramp		Adjacent Ramp	
Volume, V (vph)	4660		896			vph
Peak-hour factor, PHF	0.90		0.90			
Peak 15-min volume, v15	1294		249			v
Trucks and buses	5		5			%
Recreational vehicles	0		0			%
Terrain type:	Level		Level			
Grade	0.00	%	0.00	%		%
Length	0.00	mi	0.00	mi		mi
Trucks and buses PCE, ET	1.5		1.5			
Recreational vehicle PCE, ER	1.2		1.2			

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	5307	1020	pcph

Estimation of V12 Diverge Areas

L_{EQ} = (Equation 13-12 or 13-13)

P_{FD} = 0.580 Using Equation 9

$v_{12} = v_R + (v_F - v_R) P_{FD}$ = 3508 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
$v_{Fi} = v_F$	5307	7050	No
$v_{FO} = v_F - v_R$	4287	7050	No
v_R	1020	2100	No
v_3 or v_{av34}	1799 pc/h	(Equation 13-14 or 13-17)	
Is v_3 or v_{av34} > 2700 pc/h?		No	
Is v_3 or v_{av34} > 1.5 v_{12}/2		No	

If yes, v_{12A} = 3508 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Diverge Influence Area

	Actual	Max Desirable	Violation?
v_{12}	3508	4400	No

Level of Service Determination (if not F)

Density, $D_R = 4.252 + 0.0086\, v_{12} - 0.009\, L_D$ = 32.6 pc/mi/ln

Level of service for ramp-freeway junction areas of influence D

Speed Estimation

Intermediate speed variable,	D_S = 0.390	
Space mean speed in ramp influence area,	S_R = 56.0	mph
Space mean speed in outer lanes,	S_0 = 68.2	mph
Space mean speed for all vehicles,	S = 59.6	mph

HCS 2010: Freeway Merge and Diverge Segments Release 6.90

Merge Analysis

Analyst:	Fehr & Peers
Agency/Co.:	
Date performed:	10/19/2016
Analysis time period:	PM Peak Hour
Freeway/Dir of Travel:	US 101 Southbound
Junction:	Laurel Drive On Ramp
Jurisdiction:	Caltrans
Analysis Year:	Cumulative Plus WASP+CASP

Description: Salinas West Area Specific Plan (Without Expressway)

Freeway Data

Type of analysis	Merge	
Number of lanes in freeway	3	
Free-flow speed on freeway	65.0	mph
Volume on freeway	3764	vph

On Ramp Data

Side of freeway	Right	
Number of lanes in ramp	1	
Free-flow speed on ramp	45.0	mph
Volume on ramp	627	vph
Length of first accel/decel lane	1000	ft
Length of second accel/decel lane		ft

Adjacent Ramp Data (if one exists)

Does adjacent ramp exist?	No	
Volume on adjacent Ramp		vph
Position of adjacent Ramp		
Type of adjacent Ramp		
Distance to adjacent Ramp		ft

Conversion to pc/h Under Base Conditions

Junction Components	Freeway		Ramp		Adjacent Ramp	
Volume, V (vph)	3764		627			vph
Peak-hour factor, PHF	0.90		0.90			
Peak 15-min volume, v15	1046		174			v
Trucks and buses	5		5			%
Recreational vehicles	0		0			%
Terrain type:	Level		Level			
Grade		%		%		%
Length		mi		mi		mi
Trucks and buses PCE, ET	1.5		1.5			
Recreational vehicle PCE, ER	1.2		1.2			

Heavy vehicle adjustment, fHV	0.976	0.976	
Driver population factor, fP	1.00	1.00	
Flow rate, vp	4287	714	pcph

Estimation of V12 Merge Areas

L_{EQ} = (Equation 13-6 or 13-7)

P_{FM} = 0.605 Using Equation 3

$v_{12} = v_F (P_{FM})$ = 2596 pc/h

Capacity Checks

	Actual	Maximum	LOS F?
v_{FO}	5001	7050	No
v_3 or v_{av34}	1691 pc/h	(Equation 13-14 or 13-17)	
Is v_3 or v_{av34} > 2700 pc/h?		No	
Is v_3 or v_{av34} > 1.5 v_{12}/2		Yes	

If yes, v_{12A} = 2596 (Equation 13-15, 13-16, 13-18, or 13-19)

Flow Entering Merge Influence Area

	Actual	Max Desirable	Violation?
v_{12A}	3310	4600	No

Level of Service Determination (if not F)

Density, $D_R = 5.475 + 0.00734\, v_R + 0.0078\, v_{12} - 0.00627\, L_A$ = 24.7 pc/mi/ln

Level of service for ramp-freeway junction areas of influence C

Speed Estimation

Intermediate speed variable,	M_S = 0.338	
Space mean speed in ramp influence area,	S_R = 57.2	mph
Space mean speed in outer lanes,	S_0 = 60.7	mph
Space mean speed for all vehicles,	S = 58.4	mph

APPENDIX J –2007 FINAL SUPPLEMENT FOR THE SALINAS GENERAL PLAN FINAL PROGRAM EIR MITIGATION AND MONITORING REPORTING PROGRAM (MMRP)

2007 MITIGATION MONITORING AND REPORTING PROGRAM

Final Supplement for the 2002 Salinas General Plan Final Program EIR

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
Project Level Significant and Unavoidable Impacts				
Regional Highway System				
C3	The City will implement General Plan Implementation Program C-2 – Traffic Fee Ordinance. Implementation Program C-2 requires the City to update the Traffic Fee Ordinance to reflect projected circulation needs and apply the revised ordinance to applicable developments. The City will consider including alternative modes of transportation (bicycle and pedestrian) as projects eligible for use of Traffic Impact Fees. The City will also work with other local agencies, as well as the Transportation Agency for Monterey County (TAMC) and Caltrans on development of a regional traffic impact fee, to assist in the funding of regional transportation improvements throughout Monterey County.	Community Development, Development and Permit Services, Public Works,		
C5	The City will implement General Plan Implementation Program C-5. Implementation Program C-5 requires the City to reduce expenditure, improve design, and minimize traffic disruption by working with TAMC, Caltrans, MST, AMBAG, Monterey Bay Unified Air Pollution Control District, and other regional transportation agencies to coordinate local street improvements with major transportation system improvement projects such as improvements to Highway 101. In addition, the impacts of discretionary development projects and major transportation projects will be monitored by the City and mitigation may be required.	Community Development, Public Works, TAMC, Caltrans, County of Monterey		
C7	The City will to continue to monitor the planning process for regional circulation improvements to analyze how they would impact the Salinas circulation system. Regional roadway system impacts will be considered when making land use decisions for major development proposals within the City. If necessary, the	Community Development, Public Works, Caltrans, County of Monterey, APCD, Monterey-Salinas		

[1] All references to the Community Development, Development and Permit Services and Public Works Departments is revised- to be the Development and Engineering Services Department

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	City will revise the General Plan Circulation System to address the impact from regional circulation system improvements.	Transit		
SEIR-RT1	In addition to the roadway improvements identified in Table 5.1-11 of the Final SEIR, the City will implement the roadway improvements identified in Table 5.1-14 of the Final SEIR, where feasible, to provide LOS D or better along City roadways. For future development within the Annexation area and Settrini property, this mitigation may be satisfied by the payment of the City of Salinas Traffic Impact Fee Program, or constructing said improvements and receiving City Traffic Fee credit. This program would require the specific development within the Project area to be responsible for payment of a fee proportional to the development's impact on identified local roadway segments, or the project developers may provide the specific roadway segment improvements. The extent and timeline of the proportional mitigation will be specifically refined through the Specific Plans directing the development of the Annexation area and Settrini property. The project developers will also be responsible for payment of a Regional Development/Traffic Impact Fee, when the overall financing program is developed/approved by TAMC and this program is adopted by TAMC. The regional fee could also supplement funds for certain roadway improvements along Caltrans designated roadways within the City.	Community Development, Public Works, Caltrans, County of Monterey, APCD, Monterey-Salinas Transit		
SEIR-RT2	In addition to the roadway improvements identified in the Final SEIR Table 5.1-11, the City will work with the County of Monterey and TAMC to implement the roadway improvements identified in the Final SEIR Table 5.1-17, where feasible, to provide acceptable levels of service along County two-lane roadways. The City shall work with the County in developing fee programs as described in the 2006 Greater Salinas Area Memorandum of Understanding, agreed to by the City and County, and outlined in City Growth agreements 9 and 10: "The City and County agree to support fees and taxes needed to mitigate the collective impact of new and existing development on the regional transportation system to the extent that the fees and taxes reflect the overall financing program adopted by TAMC… the City and County agree that County will develop a County-wide Traffic Impact fee program for the improvement of major County roads in accordance with the County's adopted General Plan. The County will	Community Development, Public Works, Caltrans, County of Monterey, APCD, Monterey-Salinas Transit		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	not rely upon the imposition of an ad hoc traffic fee on City development. The development of a Traffic Impact fee for the Salinas Area … will be a priority and a nexus study and hearing process should be completed." This mitigation may be satisfied by the implementation of a Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program. When the Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program is adopted, a specific project development within the Annexation area and Settrini property would be responsible for payment of a fee proportional to the development's impact on a given road segment, or the project developers may provide the necessary improvements for an impacted roadway segment. The extent and timeline of the proportional mitigation will be established by the Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program. In addition to the Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program, the City of Salinas Traffic Impact Fee Program may supplement funds for certain County two-lane roadway segment improvements located within the municipal boundaries of the City of Salinas. In the absence of an adopted Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program, development within the Project area is still obligated to mitigate its significant regional traffic impacts to the extent feasible, which is currently identified as pro rata fair share contributions toward the various impacted facilities.			
SEIR-RT3	In addition to the roadway improvements identified in the Final SEIR Table 5.1-11, the City will work with the County of Monterey, TAMC, and Caltrans to implement the roadway improvements identified in the Final SEIR Table 5.1-21, where feasible, to provide an acceptable level of service along regional freeway segments. The City shall work with the County in developing fee programs as described in the 2006 Greater Salinas Area Memorandum of Understanding, agreed to by the City and County, and outlined in City Growth agreements 9 and 10: "The City and County agree to support fees and taxes needed to mitigate the collective impact of new and existing development on the regional transportation system to the extent that the fees and taxes reflect the overall financing program adopted by TAMC… the City	Community Development, Public Works, Caltrans, County of Monterey, APCD, Monterey-Salinas Transit		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	and County agree that County will develop a County-wide Traffic Impact fee program for the improvement of major County roads in accordance with the County's adopted General Plan. The County will not rely upon the imposition of an ad hoc traffic fee on City development. The development of a Traffic Impact fee for the Salinas Area … will be a priority and a nexus study and hearing process should be completed." This mitigation may be satisfied by the implementation of a Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program described above. When the Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program is adopted, a specific project development within the Annexation area and Settrini property would be responsible for payment of a fee proportional to the development's impact on a given road segment, or the project developers may provide the necessary improvements for an impacted roadway segment. The extent and timeline of the proportional mitigation will be established by the Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program. In addition to the Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program, the City of Salinas Traffic Impact Fee Program may supplement funds for certain regional freeway segment improvements located within the municipal boundaries of the City of Salinas. In the absence of an adopted Regional Development/Traffic Impact Fee Program and/or Countywide Traffic Impact Fee Program, development within the Project area is still obligated to mitigate its significant regional traffic impacts to the extent feasible, which is currently identified as pro rata fair share contributions toward the various impacted facilities.			
SEIR-RT4	The same performance measures, methods of analysis of impacts, and mitigation will be applied to any future annexation and Specific Plan development proposal for the area within the proposed Sphere of Influence Amendment, south of Williams Road.	Community Development, Public Works, Caltrans, County of Monterey, APCD, Monterey-Salinas Transit		
Vehicular Traffic `				
N2	The City will apply General Plan Implementation Program N-3 – Minimize Construction Noise, during the construction phase of proposed projects within	Community Development, Development and Permit		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	the community. Implementation Program N-3 requires all construction activity to comply with the limits (maximum noise levels, hours and days of allowed activity) established in the City noise regulations (Title 24 California Code of Regulations, Salinas Zoning Code, and Chapter 21A of the Municipal Code).	Services, Police		
N5	The City will implement General Plan Implementation Program N-5 – Reduce Vehicular Noise, which requires the City to reduce the impact of vehicular noise affecting existing residential development through the addition of noise reduction methods such as sound walls, berms, or others.	Community Development, Public Works		
Short-Term Air Quality				
AQ1	The City will apply General Plan Implementation Program COS-22 – Control Fugitive Dust and Particulate Matter. Implementation Program COS-22 requires the City to reduce dust and particulate matter levels by implementing fugitive dust control measures such as: • Restrict outdoor storage of fine particulate matter; • Provide tree buffers between new residential and adjacent agricultural uses; • Monitor construction and agricultural activities and emissions; and • Pave areas used for vehicular maneuvering.	Community Development		
AQ2	The City will apply General Plan Implementation Program COS-23 – Monterey Bay Unified Air Pollution Control District Air Quality Management Plan. Implementation Program COS-23 requires the City to continue to cooperate with the MBUAPCD to implement the most recent Air Quality Management Plan to address regional motor vehicle emissions. In particular, coordinate with the MBUAPCD and AMBAG, providing technical assistance and demographic data when available, during the development of future population projections by AMBAG.	Community Development, MBUAPCD, AMBAG		
AQ3	The City will apply General Plan Implementation Program COS-26 – CEQA Review of Discretionary Projects. Implementation Program COS-26 requires the City to review discretionary development proposals for potential regional and local air quality impacts per the California Environmental Quality Act (CEQA). If potential impacts are identified, mitigation will be required to	Community Development, MBUAPCD, AMBAG		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	reduce the impact to a level less than significant, where feasible.			
Long-Term Air Quality				
Previous AQ1 through AQ3	(see previous AQ1 though AQ3			
AQ4	The City will apply General Plan Implementation Program COS-23 – Electric Vehicle Charging Areas. Implementation Program COS-23 requires the City to include electric vehicle charging areas in new public and private development and redevelopment projects. The City shall also inform property owners of electric vehicle charging area programs when plans for development and redevelopment projects are submitted.	Community Development, Redevelopment Agency		
AQ5	The City will apply General Plan Implementation Program COS-25 – Transportation Control Measures. Implementation Program COS-25 requires the City to coordinate with the MBUAPCD and AMBAG to support the updated Transportation Control Measures as described in detail in the most recent AQMP. Currently, these measures include: • Improved Public Transit Service; • Areawide Transportation Demand Management; • Signal Synchronization; • New and Improved Bicycle Facilities; • Alternative Fuels; • Livable Communities (communities designed to reduce automobile dependency); • Selected Intelligent Transportation Systems; and • Traffic Calming.	Community Development, MBUAPCD, AMBAG		
AQ6	The City will apply General Plan Implementation Program COS-32 – Energy Efficient Public Buildings. Implementation Program COS-32 requires the City to implement energy conservation measures in public buildings through the following actions: • Promote energy efficient buildings and site design for all new public buildings during the site development permit process; and • Install energy saving devices in new public buildings and retrofit	Community Development, Public Works, Development and Permit Services		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	existing public buildings.			
AQ7	The City will apply General Plan Implementation Program COS-33 – Promote Energy Retrofit Programs. Implementation Program COS-33 requires the City to promote retrofit programs to reduce energy usage and consequently reduce emissions from energy consumption. Encourage utility companies to provide informational literature about available retrofit programs at City offices, the Permit Center, and libraries.	Development and Permit Services, utility companies		
Groundwater				
HW4	The City will continue to implement General Plan Implementation Program COS-3 – Watershed Management Initiative, on an ongoing basis. Implementation Program COS-3 requires the City to cooperate with Monterey County, the Regional Water Quality Control Board Central Coast (Region 3) and the Monterey County Water Resources Agency (MCWRA), providing technical assistance when necessary to help identify, protect, and preserve critical aquifer recharge areas so that their function is maintained and groundwater quality is not further degraded.	Public Works, RWQCB, MCWRA, County of Monterey, other jurisdictions		
HW9	The City will continue to implement General Plan Implementation Program LU-14 – Water and Sewer for New Development, on an ongoing basis and in response to development proposals. Implementation Program LU-14 requires the City to review development proposals and require necessary studies and water conservation and mitigation measures to ensure adequate water and sewer service.	Community Development, Public Works, Water Providers, Monterey Regional Water Pollution Control Agency (MRWPCA)		
HW10	The City will continue to implement General Plan Implementation Program COS-2 – Seawater Intrusion, on an ongoing basis. Implementation Program COS-2 requires the City to continue to cooperate with the Monterey County Water Resources Agency (MCWRA), the Army Corps of Engineers (ACOE), State Water Resources Control Board (SWRCB), and the Regional Water Quality Control Board (RWQCB) to find a solution to halt seawater intrusion toward Salinas.	Public Works, MCWRA, ACOE, SWRCB, RWQCB		
HW11	The City will continue to implement General Plan Implementation Program COS-5 – Well Monitoring, on an ongoing basis. Implementation Program COS-5 requires the City to cooperate with the County of Monterey Water Resources	Community Development, Public Works, RWQCB, MCWRA, County of		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	Agency and water service providers, providing technical assistance when necessary, to continue to monitor urban and agricultural well usage rates and quality of the groundwater.	Monterey, water service providers		
HW12	The City will continue to implement General Plan Implementation Program COS-6 – Recycled Water, on an ongoing basis. Implementation Program COS-6 requires the City, in cooperation with the state, regional, and local water agencies and suppliers, to participate in programs that seek to limit the spread of seawater intrusion into the groundwater basins through the recycling of wastewater. Specifically, the City shall support the expansion of the use of recycled water for urban and agricultural irrigation and cooperate with these agencies to establish standards and regulations for the use of recycled water in development projects.	Community Development, Development and Permit Services, Public Works, RWQCB, MCWRA, County of Monterey, other jurisdictions		
HW13	The City will implement General Plan Implementation Program COS-7 – Promote Water Conservation, on an ongoing basis. Implementation Program COS-7 requires the City to encourage water conservation throughout Salinas in the following ways: • Implementing the Salinas Urban Water Conservation Plan [see, e.g., Salinas Municipal Code, §§ 36A-6 - 36A-13], the purpose of which is to reduce pumping of water from the Salinas Valley Groundwater Basin for urban uses to the maximum extent feasible and to reduce overall pumping from the Salinas Valley Groundwater Basin by fifteen percent from the pumping that occurred in 1987; • Regulating development with the City's Zoning Code, Landscaping and Irrigation Division [Salinas Municipal Code, §§ 37-50.680 - 37-50.710], which requires developments to apply xeriscape principles including such techniques and materials as native or low water use plants and low precipitation sprinkler heads, bubblers, drip irrigation systems and timing devices; • Supporting the production of recycled water and developing new uses for recycled water; and • Applying water conservation techniques/project "water budgets" to achieve a significant reduction over historic use and over average uses for the proposed type of development by the incorporation of water conservation devices, such as low-flow toilets, flow restriction devices	Community Development, Development and Permit Services, Public Works		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	and water conserving appliances in new public and private development and rehabilitation projects.			
SEIR WS1	The City shall implement 15 percent water conservation measures for development within the Project area as described in General Plan Final Program EIR mitigation measure HW13.	Community Development, Development and Permit Services, Public Works		
SEIR WS2	The City shall confirm the availability of adequate water supply and infrastructure to ensure that development does not outpace the available water supply/infrastructure in accordance with SB 610 and SB 221.	Community Development, Development and Permit Services, Public Works		
Historic and Archaeological Resources				
CR1	The City will implement General Plan Implementation Program COS-13 – California Environmental Quality Act, prior to the approval of a discretionary project. Implementation Program COS-13 requires the City to assess discretionary development proposals for potential impacts to sensitive historic, archaeological, and paleontological resources pursuant to Section 15064.5 of the California Environmental Quality Act Guidelines. a. For structures that potentially have historic significance, the City will require that a study be conducted by a professional archaeologist or historian to determine the actual significance of the structure and potential impacts of the proposed development in accordance with CEQA Guidelines Section 15064.5. The City may require modification of the project and/or mitigation measures to avoid any impact to a historic structure, when feasible. b. For all development proposals located within the Carr Lake/Natividad Creek corridor, the City will require a study to be conducted by a professional archaeologist. The objective of the study is to determine if significant archaeological resources are potentially present and if the project will significantly impact the resources. If significant impacts are identified, the City may require the project to be modified to avoid the impacts, or require mitigation measures to mitigate the impacts. Mitigation may involve archaeological investigation and resources recovery. c. The City will assess development proposals for potential impacts to significant paleontological resources pursuant to of the California Environmental Quality Act Guidelines. If the project involves earthworks, the City may require	Community Development		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	a study conducted by a professional paleontologist to determine if paleontological assets are present, and if the project will significantly impact the resources. If significant impacts are identified, the City may require the project to be modified to avoid impacting the paleontological materials, or require mitigation measures to mitigate the impacts.			
CR2	The City will implement General Plan Implementation Program COS-14 – Historic/Architectural Preservation, on an ongoing basis. Implementation Program COS-14 requires the City to consider implementing a historic/architectural preservation program and a historic/architectural preservation ordinance that encourages public/private partnerships to preserve and enhance historically significant buildings in the community. Measures to implement may include, but are not limited to, Transfer of Development Rights (TDR), establishment of criteria for a historic/architectural resources review process, and implementation of a Mills Act program. TDR could benefit the community by protecting historic resources through an agreement that allows the development potential ("rights") on the historic property to be transferred to another property when the historic resources on the original property is preserved. The Mills Act program would involve the City entering into a contract with a property owner to change how the County Assessor calculates taxes on their property in exchange for the continued preservation of the property by the property owner. The adjusted property taxes are recalculated using a formula in the Mills Act and Revenue and Taxation Code.	Community Development, Redevelopment Agency, City Manager's Office, City Council, County Assessors Office		
CR3	The City will implement General Plan Implementation Program COS-15 – Identify Historic Sites, on an ongoing basis. Implementation Program COS-15 requires the City to promote public awareness and encourage tourism in the City by actively identifying the community's many historic resources through the location of historic landmark plaques and the Historic House Tour Guide. Promote tours of these sites on the City's and other organization's websites.	Community Development, Redevelopment Agency, Salinas Valley Chamber of Commerce, Oldtown Salinas, Monterey County Historical Society, National Steinbeck Center		
Agricultural Resources				
AG1	The City will implement General Plan Implementation Program COS-9 – Boronda Memorandum of Understanding, which requires the City to continue to	Community Development,		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	cooperate with the County of Monterey to implement the Boronda Memorandum of Understanding, which directs that City growth occur generally to the north and east away from the most productive farmland.	County of Monterey		
AG2	The City will implement General Plan Implementation Program LU-7 – City-Centered Growth, which requires the City to give priority to redevelopment and infill projects that reduce development pressure on agricultural lands. Establish an incentive program to promote these projects, such as priority permit processing and density bonuses for such developments.	Community Development, Redevelopment Agency		
AG5	The City will work with the County of Monterey, and other local jurisdictions, to create and implement an agricultural land conservation easement program including such measures as securing the dedication of easements or by paying a mitigation fee that could be used to purchase easements through a mitigation bank.	Community Development		
Public Services and Utilities-Water				
Previous HW4, HW9 though HW13	(see previous HW4, HW9 through HW13)			
Public Services and Utilities – Solid Waste				
PSU6	The City shall continue to support and cooperate with the Authority and waste haulers in their efforts to increase recycling activities in order to achieve the mandated 50 percent waste diversion goal.	Community Development, Public Works, SVSWA		
PROJECT-LEVEL IMPACTS MITIGATED TO A LEVEL LESS THAN SIGNIFICANT				
Land Use and Planning				
LU1	The City will implement General Plan Implementation Program LU-3 – Zoning and Subdivision Ordinances Update, which requires the City to review and update the Zoning Code and Subdivision Ordinance to ensure consistency with the General Plan and to help implement the General Plan policies and New Urbanism principles.	Community Development, Public Works		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
LU2	The City will implement General Plan Implementation Program LU-8 – Local Agency Formation Commission, which requires the City to be consistent with a portion of Draft Policy LU 3.4 of the Monterey County Draft General Plan, and to cooperate with LAFCO and the County of Monterey to direct growth outside the City limits to the Future Growth Area, on lands that are served or are planned to be served, with a full range of urban services, such as public water and sewer, an extensive road network, public transit, safety and emergency response services, parks, trails, and open space.	Community Development, LAFCO, County of Monterey		
LU3	The City will implement General Plan Implementation Program LU-22 – Salinas Municipal Airport Master Plan, which requires the City to update and implement the Airport Master Plan. Funding has been approved to update the Salinas Municipal Airport Master Plan. The update should contain the following: address minimum distance for the Eastern bypass south of airport, define how the Eastern bypass can best be integrated with ILS approach, and determine limitations on surrounding land uses and new roadways to allow continuation of airport operations, including the potential lengthening of runway 31/13, and the California International Airshow. Upon any update of the Airport Master Plan, the Monterey County Airport Land Use Plan or the California Airport Land Use Planning Handbook, the Salinas General Plan will be reviewed and revised, as necessary.	Community Development, Salinas Airport		
LU4	The City will implement General Plan Implementation Program LU-23 – Monterey County Airport Land Use Plan, which requires the City to continue to support the implementation of the Monterey County Airport Land Use Plan (MCALUP) and support the timely update of the MCALUP to meet new State guidelines.	Community Development, Salinas Airport, County of Monterey		
LU5	The City will implement General Plan Implementation Program COS-9 – Boronda Memorandum of Understanding, which requiring the City to continue to cooperate with the County of Monterey to implement the Boronda Memorandum of Understanding, which directs that City growth occur generally to the north and east away from the most productive farmland.	Community Development, County of Monterey		
LU6	The City will implement General Plan Implementation Program LU-7, which requires the City to encourage City-Centered Growth and give priority to redevelopment and infill projects that reduce development pressure on	Community Development, Redevelopment Agency		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	agricultural lands. The City will also establish an incentive program to promote these projects, such as priority permit processing and density bonuses for such developments.			
Local Roadway System				
C1	In addition to the roadway improvements identified in Table 5.2-4 of the Final SEIR, the City will implement the roadway Public Works improvements identified in the Final SEIR Table 5.2-7 as needed to provide a level of service D or better along City roadways.	Community Development, Public Works		
C2	The City will implement General Plan Implementation Program C-1 – Proposed Development. Implementation Program C-1 requires the City to review discretionary development proposals for potential impacts to the transportation system. The Level of Service Standards established in the Circulation Element will be used to determine the significance of impacts. Intersection level of service will be determined by vehicle delay calculations in accordance with the latest version of the Highway Capacity Manual, Transportation Research Board. Mitigation in the form of physical improvements and/or impact fees will be required for significant impacts. Adequate right-of-way along new roadways will be required to permit pedestrian and bicycle facilities. Proper roadway drainage must be provided to ensure a safe system.	Community Development, Development and Permit Services, Public Works		
C3	(see previous C3)			
C4	The City will implement General Plan Implementation Program C-3 – Capital Improvement Plan. Implementation Program C-3 requires the City to continue to update on an annual basis the Capital Improvement Plan to plan for and fund future improvements to the circulation system, as well as other public facilities, including improvements to the existing pedestrian and bicycle system, within the community.	Public Works		
C5	(see previous C5)			
C6	The City will implement General Plan Implementation Program C-7 – Transportation Control Measures. Implementation Program C-7 requires the City to support the implementation of the Transportation Control Measures	Community Development, Public Works, Caltrans, County of Monterey,		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	contained in the Monterey Bay Unified Air Pollution Control District's (APCD) Air Quality Management Plan to help reduce traffic congestion and encourage the use of alternative modes of transportation.	APCD, Monterey-Salinas Transit, AMBAG		
C8	The City will implement General Plan Implementation Program LU-22 – Salinas Municipal Airport Master Plan. Implementation Program LU-22 requires the City to update and implement the Airport Master Plan. The update should contain the following: address minimum distance for the Eastern bypass south of airport, define how the Eastern bypass can best be integrated with ILS approach, and determine limitations on surrounding land uses and new roadways to allow continuation of airport operations, including the potential lengthening of runway 31/13, and the California International Airshow. Upon any update of the Airport Master Plan, the Monterey County Airport Land Use Plan or the California Airport Land Use Planning Handbook, the Salinas General Plan will be reviewed and revised, as necessary.	Community Development, Salinas Airport		
C9	The City will implement General Plan Implementation Program C-8 – Monterey County Land Use Commission. Implementation Program C-8 requires the City to continue to coordinate with the Monterey County Airport Land Use Commission (ALUC) on projects near the airport and encourage ALUC to update its County Airport Land Use Plan.	Community Development, Salinas Airport, Public Works, County of Monterey, Development and Permit Services		
Noise				
N1	The City will apply General Plan Implementation Program N-3 – Minimize Construction Noise, during the construction phase of proposed projects within the community. Implementation Program N-3 requires all construction activity to comply with the limits (maximum noise levels, hours and days of allowed activity) established in the City noise regulations (Title 24 California Code of Regulations, Salinas Zoning Code, and Chapter 21A of the Municipal Code).	Community Development, Development and Permit Services, Police		
N2	(see previous N2)			
N3	The City will apply General Plan Implementation Program N-4 – Salinas Municipal Airport Master Plan, in concert with the update of the Salinas Airport Master Plan. Implementation Program N-4 requires the City to review and revise as necessary Table N-4, Figure N-2, and the goals, policies and noise plan	Community Development, Salinas Airport Commission, County of Monterey Airport Land Use		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	within the General Plan Noise Element to correspond with any update to the Salinas Airport Master Plan.	Commission (ALUC)		
N4	The City will apply General Plan Implementation Program N-2 – Minimize Commercial/Industrial Noise, on an ongoing basis. Implementation Program N-2 requires the City to limit delivery hours for stores and businesses with loading areas, docks, or trash bins that front, side, border, or gain access on driveways next to residential and other noise sensitive areas. The City can only approve exceptions if full compliance with the nighttime limits of the noise regulations is achieved.	Community Development, Development and Permit Services, Police		
N5	(see previous N5)			
Air Quality – Sensitive				
See previous AQ2 through AQ5	(see previous AQ2 through AQ5)			
Hydrology/Water Quality				
HW1	The City will implement General Plan Implementation Program COS-1 – Improve Surface Water Quality, on an ongoing basis and in response to development proposals. Implementation Program COS-1 requires new development projects and substantial rehabilitation projects to incorporate Best Management Practices (BMPs) pursuant to the National Pollutant Discharge Elimination System (NPDES) permit to ensure the City complies with applicable state and federal regulations.	Community Development, Development and Permit Services, Public Works		
HW2	The City will implement General Plan Implementation Program COS-4 – Public Education Programs, on an ongoing basis. Implementation Program COS-4 requires the City to coordinate with other jurisdictions and agencies within the County to develop and implement an education program to inform the public of the harm to the ocean and marine environment caused by pollutants and litter deposited on the surface of the land that can be carried in drainage systems, creeks, rivers, and ultimately the ocean.	Community Development, RWQCB, MCWRA, County of Monterey, Water Awareness Committee of Monterey, other jurisdictions		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
HW3	The City will implement General Plan Implementation Program S-6 – Pesticide Use, on an ongoing basis. Implementation Program S-6 requires the City to continue to monitor regulations governing the use of pesticides and work with the County Agricultural Commission to promote the responsible use of pesticides.	Community Development, Fire Department, County Agriculture Commission		
HW4	(see previous HW4)			
HW5	The City will implement General Plan Implementation Program LU-17 that requires, as a condition of project approval, new development to provide adequate storm water and flood management facilities to control direct and indirect erosion and discharges of pollutants and/or sediments so that "no net increase in runoff" occurs as a result of the proposed project. To determine the facility and Best Management Practices (BMPs) needs, the City will require, when necessary, a hydrological/drainage analysis to be performed by a certified and City-approved engineer, with the cost of said analysis the responsibility of the project applicant.	Public Works		
HW6	The City will implement General Plan Implementation Program S-20 – MCWRA Advisory Committee, on an ongoing basis. Implementation Program S-20 requires the City to continue to participate with the Monterey County Water Resources Agency (MCWRA) Advisory Committee for the Reclamation Ditch drainage system improvement projects.	Public Works		
HW7	The City will implement General Plan Implementation Program LU-16 – Monterey Regional Water Pollution Control Agency, on an ongoing basis. Implementation Program LU-16 requires the City to continue to work with the Monterey Regional Water Pollution Control Agency (MRWPCA) to plan for and ensure adequate capacity for sewage treatment facilities.	Public Works, MRWPCA		
HW8	The City will implement General Plan Implementation Program LU-15 – Sewer and Drainage Master Plan, on an ongoing basis. Implementation Program LU-15 requires the City to continue to implement and update the Sewer and Drainage Master Plan as necessary.	Public Works		
SEIR SD1	Future development within the Project area shall utilize a combined flow control system to achieve the hydrologic mitigation and water quality requirements that	Public Works		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	follows similar agency/industry hydro-modification recommendations. The proposed flow control system will include one or more of the following components, which are illustrated in the schematic [in the Final SEIR] and include (1) duration control/water quality treatment basin, (2) pretreatment wetlands, (3) retention/infiltration basin, (4) diversion outlet to either the retention basin or the downstream receiving waters, and (5) sediment forebays to trap small amounts of sediment entering the Project area. The flow control facility will provide hydraulic distribution of flows for water quality treatment, duration/volume control and peak flow attenuation. The facility will provide temporary runoff storage volume to attenuate the peak flow rate and will also incorporate "extended detention" to provide water quality treatment for storm flows as part of the hydraulic detention time for stored runoff. Extended detention is designed with outlets that hydraulically limit the release of the stored runoff volume specifically for the water quality design storm volume (e.g. 85th percentile 24-hour storm) for some minimum time (e.g., 48 hours) to allow particles to settle. The flow control facility will also incorporate a pre-settling zone to provide additional treatment and mitigate nuisance/dry-weather flows. The facility will also provide "retention" that is separate and hydraulically independent of the "detention" zone. The retention feature will store the difference in runoff volume between the pre- and post-development conditions. The flow control facility may consist of single or multiple basins; or equivalent device(s) meeting these hydraulic and water quality performance requirements. Water quality treatment for storm water runoff and urban dry-weather flows will also be provided through the detention/retention basins system within the flow control facility portion.			
SEIR SD2	Future development within the Project area will include Low Impact Development (LID) features to be implemented through site design techniques within the Project area land plan as design elements. LID features will use natural vegetation and small-scale treatment systems to treat and infiltrate storm water runoff close to its origin.	Public Works		
Hazards and Hazardous Materials				

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
H1	The City will implement General Plan Implementation Program S-8 – Household Hazardous Waste Program, which requires the City to continue to work with the Salinas Valley Solid Waste Authority to implement the Household Hazardous Waste program to protect resident from dangers resulting from the use, transport, and disposal of hazardous materials used in the home.	County of Monterey Environmental Health Division, Salinas Valley Solid Waste Authority		
H2	The City will implement General Plan implementation Program S-9 – Small Business Hazardous Waste Program, which requires the City to continue to work with the Salinas Valley Solid Waste Authority to implement the Small Business Hazardous Waste Program, which allows qualified small businesses to dispose of their hazardous wastes at the Salinas Hazardous Household Waste Collection Facility.	County of Monterey Environmental Health Division, Salinas Valley Solid Waste Authority		
H3	The City will implement General Plan Implementation Program S-7 – Hazardous Materials, which requires the City to minimize public health risks and environmental risks from the use, transport, storage, and disposal of hazardous materials by: • Cooperating with federal, state, and county agencies to effectively regulate the management of hazardous materials and hazardous waste; • Cooperating with the County of Monterey to implement the applicable portions of the County Hazardous Waste Management Plan; • Identifying roadway transportation routes for conveyance of hazardous materials (the City does not exercise jurisdictional over transportation of freight along railroad right-of- way or state highways); • Implementing the Multi-Hazard Emergency Plan for accidents involving hazardous materials; and • Cooperating with the Certified Unified program Agency (CUPA) for Salinas (the County of Monterey, Environmental Health Division) and the Salinas Fire Department to administer Risk Management Plans for businesses within the City. • Requiring development project applicants to provide a hazardous materials report documenting past uses of the property and reporting the results of soil sampling where needed to determine whether remediation is required.	County of Monterey, Environmental Health Division, Salinas Fire Department, California Department of Transportation		
H4	The City will implement General Plan Implementation Program S-6 – Pesticide Use, which requires the City to continue to monitor regulations governing the	Community Development, Fire Department, County		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	use of pesticides and work with the County Agricultural Commission to promote the responsible use of pesticides.	Agriculture Commission		
H5	The City will implement General Plan Implementation Program S-18 – Flood Control Insurance, which requires the City to continue to participate in the National Flood Insurance Program (NFIP).	Community Development, Development and Permit Services, Public Works		
H6	The City will implement General Plan Implementation Program S-19 – Flood Overlay District Regulations, which requires the City to continue to apply the Flood Overlay District regulations, pursuant to the City's Zoning Code and implement Section 9, Article VI of the Municipal Code, to minimize the potential impact to and from new development in areas subject to flooding. Update the boundaries of the District as needed to reflect current hydrologic conditions.	Community Development, Development and Permit Services, Public Works		
H7	The City will implement General Plan Implementation Program LU-17 – Project-Related Flood Control and Stormwater Management, which requires, as a condition of project approval, new development to provide adequate storm water and flood management facilities as determined by the Public Works Department. In order to determine the facility and Best Management Practices (BMP) needs, the City may require a hydrological/drainage analysis to be performed by a certified an City-approved engineer, with the cost of said analysis the responsibility of the project applicant.	Public Works		
H8	The City will implement General Plan Implementation Program S-22 – Promote Fire Prevention, which requires the City to promote fire prevention in Salinas by: • Working closely with the Salinas Fire Department to implement fire hazard education and fire prevention programs; • Coordinating with Cal Water and Alco water districts and the Salinas Fire Department to ensure that water pressure for existing developed areas and sites to be developed is adequate for fire fighting purposes; • Conform to Fire Department requirements for individual projects; • Adopting and implementing the most recent Uniform Fire Code provisions and appropriate amendments; and • Continue to require sprinklers in new buildings.	Development and Permit Services, Fire Department, water companies		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
H9	The City will implement General Plan Implementation Program CD-10 – Weed Abatement, which requires the City to continue to monitor and abate weeds throughout the community.	Weed Abatement Specialist		
H10	The City will implement General Plan Implementation Program LU-12 – Fire Protection, Emergency Services, and Law Enforcement Annual Level Of Service Review, which requires the City to review the level of services and funding levels at budget time, adjusting when necessary to ensure that adequate levels of service are provided and facilities are maintained.	Fire Department, Police Department		
H11	The City will implement General Plan Implementation Program LU-21 – Salinas Municipal Airport Master Plan, which requires the City to continue working with the Salinas Airport Commission to implement the Airport Master Plan, providing technical assistance and information to the Commission when necessary. Funding has been approved to update the Salinas Municipal Airport Master Plan. The update should contain the following: address minimum distance for Eastern bypass south of airport, define how Eastern bypass can best be integrated with ILS approach, and determine limitations on surrounding land uses and new roadways to allow continuation of airport operations, including the potential lengthening of runway 31/13, and the California International Airshow. Upon any update of the Airport Master Plan, the Monterey County Airport Land Use Plan or the California Airport Land Use Planning Handbook, the Salinas General Plan will be reviewed and revised, as necessary.	Community Development, Salinas Airport		
H12	The City will implement General Plan Implementation Program C-8 – Monterey County Airport Land Use Commission, which requires the City to continue to coordinate with the Monterey County Airport Land Use Commission (ALUC) on projects near the airport. Encourage ALUC to update its County Airport Land Use Plan.	Community Development, Salinas Airport, Public Works, County of Monterey, Development and Permit Services		
H13	The City will implement General Plan Implementation Program S-11 – Air Transportation Safety, which requires the City to minimize the potential for accidents related to aircraft operation by coordinating with the Monterey County Airport Land Use Commission (ALUC) to review development proposals for compatibility with the Salinas Municipal Airport Master Plan, Monterey County Airport Land Use Plan, and California Airport Land Use Planning Handbook for	Community Development, Development and Permit Services, Monterey County ALUC, Salinas Airport		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	comprehensive airport land use planning.			
H14	The City will implement General Plan Implementation Program S-12 – Salinas Municipal Airport Master Plan, which requires the City to revise the Airport Master Plan in order to update operational and safety procedures, reflect State and Federal mandates, better utilize airport property, and recommend land use compatibility standards for land surrounding the airport.	Community Development, Salinas Airport, ALUC		
H15	The City will implement General Plan Implementation Program N-4 – Salinas Municipal Airport Master Plan, which requires the City upon any update of the Salinas Municipal Airport Master Plan, the County Airport Land Use Plan, or California Airport Land Use Planning Handbook, review and revise as necessary Table N-4, Figure N-2, and the goals, policies, and noise plan within the General Plan Noise Element to correspond with the updated Airport Master Plan.	Community Development, Salinas Airport Commission, ALUC		
H16	The City will implement General Plan Implementation Program S-23 – Multi-hazard Emergency Plan, which requires the City to annually review and update the Multi-Hazard Emergency Plan under the provision of the State Emergency Management System format to maximize the efforts of emergency service providers (e.g., fire, medical, and law enforcement) and minimize human suffering and property damage during disasters. Provide annual practice sessions to the City. Support high-level multi-jurisdictional cooperation and communication for emergency planning and management. Solicit private individuals and organizations to enhance service provider communications and response with cellular telephones, ham radios, AM/FM radio, and cable television.	Community Development, Police Department, Fire Department, public and private medical facilities, Monterey County Emergency Communications, Monterey County Mobile Emergency Coordination Unit, Federal Emergency Management Agency (FEMA), American Red Cross, Monterey County Office of Emergency Services		
H17	The City will implement General Plan Implementation Program S-23 – Emergency Preparedness Education, which requires the City to coordinate with local agencies and organizations to educate all citizens to take appropriate action to safeguard life and property during and immediately after emergencies.	Fire Department, Federal Emergency Management Agency (FEMA), American Red Cross, Monterey County Office of Emergency Services		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
Biological Resources				
BR1	The City will implement General Plan Implementation Program COS-17 – Setbacks and Open Space Easements to Protect Riparian and Wetland Corridors, on an ongoing basis. Implementation Program COS-17 requires project developers to protect and enhance riparian corridors through setbacks and open space easements within development areas along Gabilan and Natividad Creeks and other streams in the planning area. Protect and enhance wetlands by requiring setbacks and open space easements within future development areas in the planning area. A 100-foot setback area shall be established along Gabilan and Natividad Creeks and other unnamed creeks within the planning area. The setback shall be measured from the top of bank, or outside edge of riparian woodland, whichever is greater. A 100-foot setback area shall be established along wetlands not associated with creeks (i.e., seasonal wetland swales or ponds) within the planning area. The riparian setback shall be measured from the top of bank, or outside edge of riparian woodland, whichever is greater. The wetland setback shall be measured from the outside edge of the wetland. Except as set forth below, development activities would be prohibited in the setback area; however, the City shall consider exceptions for passive recreational uses (i.e., trails, playfields, and picnic areas). Except as set forth below, no building or structure shall be developed in the setback area. The existing riparian woodland or wetland shall be protected from construction disturbance. Fencing shall be temporarily placed at the outside edge of the setback area during construction. This fencing shall remain in-place until construction is complete. If recreational trails are placed within the buffer area, implement a re-vegetation program wherein a vegetative buffer is established between the trail and the outside edge of the riparian woodland. For properties located in the City's existing boundary as indicated on *Figure LU-1of the General Plan Land Use Element*, development activities may be considered within the setback area if the City Planner determines the encroachment will not have a significant adverse impact on the riparian and wetland resources either because: i) the implementation of alternative mitigation measures will achieve a comparable or a better level of mitigation than the strict application of the one hundred foot (100') setback, or ii) the property being developed is adjacent to a reclamation ditch, and no riparian or wetland resources are identified outside the areas of the improved ditch, as demonstrated and confirmed in either case by a biotic resources study (prepared for the City Planner by his or her designee). The	Community Development, Development and Permit Services, Recreation-Parks, ACOE, FWS, CDFG		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	applicant shall be responsible for the costs of the study, mitigation, and required monitoring.			
BR2	The City will implement General Plan Implementation Program COS-17 – Riparian/Wetland Habitat Mitigation and Management, on an ongoing basis. Implementation Program COS-17 requires the project developer to retain creeks and wetlands in their natural channels rather than placing them in culverts or underground pipes, where feasible. Where streambanks must be deepened, widened or straightened, they should be landscaped and revegetated afterward. Where wetlands are impacted, they should be re-created afterwards. If impacts are incurred to creeks and/or riparian woodlands as part of development within the planning area, the project applicant shall develop and implement a riparian/wetland habitat mitigation and management plan. The plan shall specify the replacement ratio for impacts to riparian resources and to wetland resources, pursuant to current state and federal policies. The project applicant shall receive authorization to fill wetlands and "other" waters from the US Army Corps of Engineers, pursuant to the requirements of the Clean Water Act. The project applicant shall also obtain a water quality certification (or waiver) from the Regional Water Quality Control Board, consistent with requirements of this State agency. The project applicant shall also obtain a 1601/1603 Streambed Alteration Agreement from the California Department of Fish and Game, pursuant to Fish and Game Code. These permits shall be received prior to any site grading that may occur in or immediately adjacent to creeks or wetlands. The project applicant shall also receive authorization from the National Marine Fisheries Service for "take" of steelhead and from the U. S. Fish and Wildlife Service for "take" of California red-legged frog, if work cannot avoid impacts to creek resources and/or these species. Pursuant to provisions of the Section 404 permit, 1601/1603 Streambed Alteration Agreement and State water quality certification (or waiver), the	Community Development, ACOE, FWS, CDFG		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	project applicant shall implement a riparian/wetland mitigation plan, and any other measures so identified by regulatory agencies. This plan shall identify measures for the applicant to compensate for unavoidable impacts to riparian or wetland resources. A minimum 1:1 replacement ratio is typically recommended for impacted wetland resources to satisfy requirements of the U.S. Army Corps of Engineers and the Regional Water Quality Control Board (RWQCB). A minimum 3:1 replacement ratio is typically recommended for impacted riparian resources to satisfy requirements of the CDFG. The applicant shall also identify and implement a 5-year maintenance and monitoring program.			
BR3	The City will implement General Plan Implementation Program COS-19 – Reduce Nitrate and Sediment Input to Creeks, on an ongoing basis. Implementation Program COS-19 requires the City to cooperate with the Regional Water Quality Control Board and the Resource Conservation District in their efforts to develop a plan to assist agricultural operations to reduce nitrate and sediment input to creeks. Such a plan will enhance water quality and benefit aquatic plants and wildlife within the planning area as well as downstream.	Community Development, Regional Water Quality Control Board, Resource Conservation District		
BR4	The City will implement General Plan Implementation Program COS-20 – Oak Tree Retention, on an ongoing basis. Implementation Program COS-20 requires the project developer to retain coast live oak and valley oak trees within the planning area, including oaks within new development areas. All coast live oak and valley oak trees should be surveyed prior to construction to determine if any raptor nests are present and active. If active nests are observed, the construction should be postponed until the end of the fledgling.	Community Development		
BR5	The City will implement General Plan Implementation Program COS-21 – Protection and Enhancement of Special Status Species, on an ongoing basis. Implementation Program COS-20 requires the project developer to protect and enhance special status species habitat through setbacks and open space easements within new development and/or redevelopment areas. Protection and enhancement of special status species habitat by State and Federal Agencies, with the cooperation of the City, to ensure persistence of the species within the setback areas. Surveys shall be conducted at the appropriate season to ascertain whether the habitats within the proposed project area support special status species. If	Community Development, ACOE, FWS, CDFG		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	special status species are observed, avoidance measures shall be implemented. A qualified biologist shall conduct a biological assessment of all habitat areas to assess the potential for the following special status species: Congdon's tarplant, Contra Costa goldfields, Pinnacles buckwheat, Alkali milk-vetch, Santa Cruz clover, Hutchinson's larkspur, Kellogg's horkelia, Burrowing owl, and/or California tiger salamander. If suitable habitat for any of these species is observed, then focused surveys during the appropriate season should be conducted. Such surveys would include winter and spring surveys for tiger salamander, protocol presence/absence surveys for burrowing owl, and spring/summer surveys for special status plant species. The California Department of Fish and Game shall be consulted regarding the appropriate level of effort and protocol prior to conducting focused wildlife species surveys. If any of these species are found to inhabit the survey area, the City may require the preparation and implementation of a Habitat Management Plan to provide protection for the habitat. If impacts to occurrences are deemed unavoidable, the plan shall identify mitigation measures to compensate for impacts to the species. As part of the Habitat Management Plan, a 100-foot buffer shall be established around rare plant occurrences. The plan shall include measures to manage the rare plant occurrences for their protection and persistence at the site. The Habitat Management Plan shall be reviewed and approved by California Department of Fish and Game and/or USFWS prior to issuance of any permits by the City. Prior to any proposed development within 150 feet of the stream corridors, protocol presence/absence surveys for California red-legged frog, southwestern pond turtle, and nesting birds should be conducted. If these species are observed, the CDFG and the USFWS should be consulted regarding appropriate measures to avoid and mitigate potential impacts of the project on these species. The City shall not issue any permits prior to obtaining written approval from the CDFG and/or USFWS that the proposed mitigation plan has been approved. Prior to any proposed development within or adjacent to oak woodland, a qualified biologist should conduct surveys to determine if protected wildlife species are nesting in the oak woodland, e.g., nesting raptors. If trees are to be removed, a qualified bat biologist should evaluate the trees as potential bat roost sites prior to removal, and recommend measures to avoid impacts to bats, such			

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	as exclusionary devices.			
Agricultural Resources				
AG3	The City will implement General Plan Implementation Program COS-11, which requires the City to be consistent with the County of Monterey's "Right-to-Farm" Ordinance, and the County of Monterey Draft General Plan Policy LU-7.8 and Actions LU-7.b and LU-7.c, revise the City's Zoning Ordinance to require the recordation of a Right-to-Farm Notice as a condition of discretionary permit approval for residential development within 1,000 feet of an established agricultural operation. The purpose of the Notice is to acknowledge that residents in the area may experience inconveniences and discomfort associated with the normal farming and grazing activities, such as noise and dust. The Notice shall specifically state that a variety of activities may occur that may be incompatible with the proposed development and that an established agricultural operation in full compliance with applicable laws, shall not be considered a nuisance due to changes in the surrounding area. The Notice shall also state that a person's right to recover under a nuisance claim against these activities may be restricted.	Community Development, ACOE, FWS, CDFG		
AG4	The City will implement General Plan Implementation Program COS-10 - Buffers, which requires the City to encourage the provision and maintenance of buffers, such as roadways, topographic features, and open space, to prevent incompatibilities between agricultural and non-agricultural land uses. A number of factors shall be used to determine the appropriate buffer, including type of agricultural use, topography, and pesticide and machinery use, among others.	Community Development		
Geology/Soils				
GS1	The City will implement General Plan Implementation Program S-14, Natural Hazards Risk Reduction, prior to the approval of a discretionary permit. Implementation Program S-14 requires the City to assess development proposals for potential hazards pursuant to the California Environmental Quality Act, requiring measures when necessary to mitigate all identified public safety hazards.	Community Development, Fire Department, Public Works		
GS2	The City will implement General Plan Implementation Program S-15 – Open	Community Development		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	Space Easements for Natural Hazards, when the threat from natural hazards cannot be mitigated through geotechnical and structural design methods. Implementation Program S-15 requires the City to use open space easements and other regulatory techniques to prohibit development and avoid unmitigable public safety hazards.			
GS3	The City will implement General Plan Implementation Program S-16 – Structural Design, on an ongoing basis. Implementation Program S-16 requires the City to implement the most recent state building and seismic requirements for the structural design of new development and redevelopment projects.	Development and Permit Services		
GS4	The City will implement General Plan Implementation Program S-17 – Soil and Geologic Surveys, on an ongoing basis. Implementation Program S-17 requires that during the review of development and redevelopment proposals, the City require surveys of soil and geologic conditions by state licensed Engineering Geologists and Civil Engineers where appropriate. When potential geologic impacts are identified, the City shall require project applicants to mitigate the impacts per the recommendations contained within the geologic survey.	Community Development, Development and Permit Services, Public Works		
GS5	The City will implement General Plan Implementation Program S-23 – Multi-hazard Emergency Plan, on an ongoing basis. Implementation Program S-23 requires the City to maintain the Multi-hazard Emergency Plan under the provision of the State Emergency Management System format to maximize the efforts of emergency service providers (e.g., fire, medical, and law enforcement) and minimize human suffering and property damage during disasters. Support high-level multi-jurisdictional cooperation and communication for emergency planning and management. Solicit private individuals and organizations to enhance service provider communications and response with cellular telephones, ham radios, AM/FM radio, and cable television.	Community Development, Police Department, Fire Department, public and private medical facilities, Monterey County Emergency Communications, Monterey County Mobile Emergency Coordination Unit, Federal Emergency Management Agency (FEMA), American Red Cross, Monterey County Office of Emergency Services		
GS6	The City will implement General Plan Implementation Program S-24 – Emergency Preparedness Education, on an ongoing basis. Implementation Program S-23 requires the City coordinate with local agencies and organizations	Fire Department, Federal Emergency Management Agency (FEMA), American

	to educate all residents and businesses to take appropriate action to safeguard life and property during and immediately after emergencies.	Red Cross, Monterey County Office of Emergency Services		
Aesthetics				
A1	The City will implement General Plan Implementation Program CD-1 – City Gateway Guidelines. Implementation Program CD-1 requires the City to implement the City's Gateway Guidelines addressing identification graphics and entry signs, lighting, and landscaping for the City's major entry points identified in Figure CD-1.	Community Development		
A2	The City will implement General Plan Implementation Program CD-2 – Architectural Design. Implementation Program CD-2 requires the City to strengthen the City's Design Guidelines and require compliance to enhance the City's visual appeal and ensure compatible, aesthetically pleasing development with particular emphasis on: 1) historic areas of the community; and 2) properties visible from Highway 101.	Community Development, Redevelopment Agency		
A3	The City will implement General Plan Implementation Program CD-3 – Lighting Ordinance, on an ongoing basis. Implementation Program CD-3 requires the City to improve the City Lighting Ordinance to ensure that: 1) all future outdoor lights include cut-off lenses to minimize light dispersion above the fixture head; 2) a lighting study is required to be performed when appropriate to ensure adequate light levels, while not exceeding industry standards; and 3) sky glow is reduced.	Community Development		
A4	The City will implement General Plan Implementation Program CD-4 – Landscaping Standards, on an ongoing basis. Implementation Program CD-4 requires the City to implement landscaping requirements for public and private development and redevelopment projects to promote greater visual and functional compatibility with residential development and pedestrian/bicycle use.	Community Development, Redevelopment Agency		
A5	The City will implement General Plan Implementation Program CD-5 – Review Discretionary Development Projects, on an ongoing basis. Implementation Program CD-5 requires the City to review discretionary development proposals	Community Development		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	for potential aesthetics impacts per the California Environmental Quality Act (CEQA). The standards established in the Zoning Code, the City's Design Guidelines, Landscaping Standards, Lighting Ordinance, Gateway Guidelines, the projects incorporation of Traditional Neighborhood Development (TND) characteristics, and the projects potential to damage or block scenic resources and views will be used to determine the significance of impacts. If potential impacts are identified, mitigation in the form of project redesign (e.g., bulk, height, architectural details, lighting) will be required to reduce the impact to a level less than significant.			
A6	The City will implement General Plan Implementation Program COS-10 – Buffers, on an ongoing basis. Implementation Program COS-10 requires the City to encourage the provision and maintenance of buffers, such as roadways, topographic features, and open space, to prevent incompatibilities between agricultural and non-agricultural land uses. A number of factors shall be used to determine the appropriate buffer, including type of agricultural use, topography, and pesticide and machinery use, among others.	Community Development		
A7	The City will implement General Plan Implementation Program COS-9 – Boronda Memorandum of Understanding, on an ongoing basis. Implementation Program COS-9 requires the City to continue to cooperate with the County of Monterey to implement the Boronda Memorandum of Understanding, which directs that City growth occur generally to the north and east away from the most productive farmland.	Community Development, County of Monterey		
A8	The City will implement General Plan Implementation Program LU-7 – City-Centered Growth, on an ongoing basis. Implementation Program LU-7 requires the City to give priority to redevelopment and infill projects that reduce development pressure on agricultural lands and establish an incentive program to promote these projects, such as priority permit processing and density bonuses, for such developments.	Community Development, Redevelopment Agency		
A9	The City will implement General Plan Implementation Program CD-8 – California Main Street Program on an ongoing basis. Implementation Program CD-8 requires the City to expand community participation in the Main Street Program and continue to work with the Program to create an identity that emphasizes our cultural heritage and attracts businesses and consumers to the	Community Development, Public Works, Redevelopment Agency, Oldtown Salinas organization		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	downtown area.			
A10	The City will implement General Plan Implementation Program COS-14 – Historic/Architectural Preservation, on an ongoing basis. Implementation Program COS-13 requires the City to consider implementing a historic/architectural preservation program and a historic/architectural preservation ordinance that encourages public/private partnerships to preserve and enhance historically significant buildings in the community. Measures to implement may include, but are not limited to, Transfer of Development Rights (TDR), establishment of criteria for a historic/architectural resources review process, and implementation of a Mills Act program. TDR could benefit the community by protecting historic resources through an agreement that allows the development potential ("rights") on the historic property to be transferred to another property when the historic resources on the original property is preserved. The Mills Act program would involve the City entering into a contract with a property owner to change how the County Assessor calculates taxes on their property in exchange for the continued preservation of the property by the property owner. The adjusted property taxes are recalculated using a formula in the Mills Act and Revenue and Taxation Code.	Community Development, Redevelopment Agency, City Manager's Office, City Council, County Assessors Office		
Population and Housing				
PH1	The City will implement General Plan Implementation Program HE-2 – Provision of Future Sites, which requires the City to continue to work with the Local Agency Formation Commission to ensure that sufficient land, infrastructure, and services are available to support housing development.	Community Development		
PH2	The City will implement General Plan Implementation Program LU-12 – Fire Protection, Emergency Services, and Law Enforcement Annual Level of Service Review, which requires the City to review the level of services and funding levels at budget time, adjusting when necessary to ensure that adequate levels of service are provided and facilities are maintained.	Fire Department, Police Department		
PH3	The City will implement General Plan Implementation Program C-3 – Capital Improvement Plan, which requires the City to continue to update on an annual basis the Capital Improvement Plan to plan for and fund future improvements to	Public Works		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	the circulation system, as well as other public facilities, including improvements to the existing pedestrian and bicycle system, within the community.			
PH4	The City will implement General Plan Implementation Program COS-9 – Boronda Memorandum of Understanding, which requires the City to continue to cooperate with the County of Monterey to implement the Boronda Memorandum of Understanding, which directs that City growth occur generally to the north and east from the most productive farmland.	Community Development, County of Monterey		
PH5	The City will implement General Plan Implementation Program COS-33 – Promote Energy Retrofit Programs, which requires the City to promote retrofit programs by the City to reduce energy usage and consequently reduce emissions from energy consumption. Encourage utility companies to provide informational literature about available retrofit programs at City offices, the Permit Center, and libraries.	Development and Permit Services, utility companies		
PH6	The City will implement General Plan Implementation Program CD-11 – Smart Growth Principles, which requires the City to use the Smart Growth Network's Getting to Smart Growth: 100 Policies for Implementation (ICMA, 2002) or other similar policy manual, perform an "audit" of the City's Zoning and Subdivision Ordinances to identify potential impediments to the development of smart growth and traditional neighborhood development projects. Revise, adopt, and implement new standards and procedures as necessary to encourage smart growth and traditional neighborhood development in Salinas.	Community Development, Public Works		
PH7	The City will implement General Plan Implementation Program COS-23 – Monterey Bay Unified Air Pollution Control District Air Quality Management Plan, which requires the City to continue to cooperate with the Monterey Bay Unified Air Pollution Control District to implement the most recent Air Quality Management plan to address regional motor vehicle emissions. In particular, coordinate with the District and AMBAG, providing technical assistance and demographic data when available, during the development of future population projections by AMBAG.	Community Development, Monterey Bay Unified Air Pollution Control District, AMBAG		
Public Services and Utilities				
PSU1	The City shall require new development to provide parkland and/or in-lieu fees,	Recreation-parks		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	as allowed by law, to provide for three acres of parkland for every 1,000 residents.			
PSU2	The City will implement General Plan Implementation Program LU-16 – Monterey Regional Water Pollution Control Agency, which requires the City to continue to work with the Monterey Regional Water Pollution Control Agency (MRWPCA) to plan for and ensure adequate capacity for sewage treatment facilities.	Public Works, MRWPCA		
PSU3	The City will implement General Plan Implementation Program LU-14 – Water and Sewer Services for New Development, which requires the City to review development proposals and require necessary studies, as appropriate, and water conservation and mitigation measures to ensure adequate water and sewer service.	Community Development, Public Works, Water Providers, Monterey Regional Water Pollution Control Agency (MRWPCA)		
PSU4	The City will implement General Plan Implementation Program LU-15 – Sewer and Drainage master Plan, which requires the City to continue to implement and update the Sewer and Drainage Master Plan as necessary. In addition, as part of the Master Plan update, the City will analyze the need for additional pump station capacity and identify methods to reduce the wet weather flows.	Public Works		
PSU5	Requires developers and the City to install essentially leak-free sewer piping in new developments and in City collection system projects that will prevent inflow/infiltration (I/I) from entering the system. City shall also conduct smoke testing, inspection, and improvements to the existing sanitary sewer system to help prevent I/I.	Public Works		
SEIR WW1	The City shall implement 15 percent water conservation measures for development within the Project area.	Community Development, Development and Permit Services, Public Works		
SEIR WW2	The City shall confirm the availability of adequate sewage treatment capacity prior to the approval of each tentative subdivision map within the Project area.	Community Development, Development and Permit Services, Public Works

Global Climate Change				
SEIR GCC1	Within 36 months, the City shall establish a global climate change action plan that includes a baseline inventory of all GHG emissions associated with all residences, businesses, industries, agriculture, municipal operations, and other sources within the City limits; establishment of a GHG emissions reduction	Community Development, Development and Permit Services, Public Works		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	target; development of enforceable, feasible GHG emissions reduction measures to meet the established target; and performance monitoring of the GHG emissions reduction measures shall occur every 3 years to ensure the emissions reductions are being achieved.			
SEIR GCC2	Prioritized parking within new commercial and retail areas shall be given to electric vehicles, hybrid vehicles, and alternative fuel vehicles.	Community Development, Development and Permit Services, Public Works		
SEIR GCC3	The City shall require that new or major rehabilitation (additions of 25,000 square feet of office/retail commercial or 100,000 square feet of industrial floor area) for residential projects of 6 units or more comply with at least one of the following: • Participate in the CEC's New Solar Homes Partnership (this program provides rebates to developers of 6 units or more who offer solar power in 50 percent of new units), or a similar program with solar power requirements equal to or greater than those of the CEC's New Solar Homes Partnership as demonstrated to the City by the project applicant. • Design, construct, or retrofit 50 percent of the square footage of the building(s) that are part of the project capable of being certified under one of the following Leadership in Energy and Environmental Design (LEED) or equivalent building rating systems: LEED for New Construction; LEED for Existing Buildings, LEED for Homes, LEED for Core & Shell, or any Application Guides of these rating systems. However, no formal LEED certification shall be required, and the City Manager or his/her designee shall make the determination that the potential for LEED certification has been achieved. All credits used to demonstrate capability to meet one of the above certifications must directly or indirectly result in a reduction in GHG emissions.	Community Development, Development and Permit Services, Public Works		
SEIR GCC4	The City shall require that new or major rehabilitation (additions of 25,000 square feet of office/retail commercial or 100,000 square feet of industrial floor area) of commercial, office, or industrial development greater than or equal to 25,000 square feet in size must incorporate renewable energy generation (on- or off-site) to provide 15 percent or more of the project's energy needs.	Community Development, Development and Permit Services, Public Works		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
SEIR GCC5	The City shall require new development or redevelopment projects in excess of 10 acres in size be capable of meeting the certification requirements of the LEED for Neighborhood Development Rating System Pilot Version (February 2007) ("LEED ND"). However, no formal certification shall be required, and the City Manager or his/her designee shall make the determination that the potential for certification has been achieved. All credits used to demonstrate capability to meet the LEED ND certification must directly or indirectly result in a reduction in GHG emissions.	Community Development, Development and Permit Services, Public Works		
SEIR GCC6	The City shall require that the design or purchase of any new street lights and water and wastewater pumps and treatment systems achieve a 10 percent reduction beyond an estimated baseline energy use for this infrastructure. All new traffic lights installed within Salinas shall use LED technology.	Community Development, Development and Permit Services, Public Works		
SEIR GCC7	The City shall require all new development or major rehabilitation (additions of 25,000 square feet of office/retail commercial or 100,000 square feet of industrial floor area) projects to recycle and/or salvage at least 50 percent of nonhazardous construction and demolition debris. To implement this requirement, a construction waste management plan identifying materials to be diverted from disposal and whether the materials will be stored on-site or commingled shall be developed and implemented by the applicant for said development or rehabilitation. Excavated soil and land-clearing debris do not contribute to this credit. Calculation can be done by weight or volume but must be consistent throughout.	Community Development, Development and Permit Services, Public Works		
SEIR GCC8	The City shall require all new development and major rehabilitation (additions of 25,000 square feet of office/retail commercial or 100,000 square feet of industrial floor area) projects to incorporate any combination of the following strategies to reduce heat gain for 50 percent of the nonroof impervious site landscape (including roads, sidewalks, courtyards, parking lots, and driveways): • Shaded (within 5 years of occupancy) • Paving materials with a Solar Reflectance Index (SRI) of at least 29 • Open grid pavement system • Parking spaces under cover (defined as underground, under deck, under roof, or under a building). Any roof used to shade or cover parking	Community Development, Development and Permit Services, Public Works		

Mitigation Number	Nature of Mitigation	Responsible Agency/Department[1]	Implementation Confirmed	Remarks
	must have an SRI of at least 29.			
SEIR GCC9	The City shall require that all new development or major rehabilitation (additions of 25,000 square feet of office/retail commercial or 100,000 square feet of industrial floor area) projects incorporate "green building" points in construction plans prior to issuing a permit to build. Such points may be achieved through checklists identified by New Home Construction Green Building Guidelines available at www.builditgreen.org, or through a similar list that distinguishes specific measures targeting efficiencies in energy, resource use, or other measures that would also directly or indirectly result in GHG emission reductions. Specific efficiencies that would reduce GHG emissions should be implemented where feasible for all project areas including site design, landscaping, foundation, structural frame and building envelope, exterior finishing, plumbing, appliance use, insulation, heating, venting and air conditioning, building performance, use of renewable energy, finishes, and flooring.	Community Development, Development and Permit Services, Public Works
